

Cirila Gervacio

Frontend Web Developer

I am working as a Frontend Web Developer for nearly a year now. Previously worked as a Senior Chemist in a Multinational Coatings company. The change in my career has been a plan for many years already and now, after sleepless nights, self-studying and doing side-projects, I am now a full time Web Developer in a custom Web Development company in Canada. With my excellent problem solving skills from being a Chemist for a decade, I am able to contribute in Frontend Web development projects by using React with TypeScript/JavaScript and NodeJS to create APIs. All the knowledge, experiences as well as the soft skills I gained contributed to me being an effective Web Developer. I am delighted that I am able to finally pursue this dream job. It's never too late. Dedication, perseverance, and consistency are what aided me in achieving this new career.

Work

Frontend Web Developer

www.majisti.com

Feb 2023 – Present

I currently work at Majisti as a versatile Web Developer. I am responsible for the development of the brand redesign using React and TypeScript, with Chakra UI. In addition, I am also responsible for the automation of content creation and maintenance of technical blogs for the company to increase its visibility in terms of recruitment and services offered. In line with this, I also design and develop graphics and illustrations, integrate multimedia, including video to the company's social media accounts. With my technical knowledge and skills, a part of my responsibilities is to assist in technical hiring interviews for Canadian developers.

- Collaborate with stakeholders and developers across the company to discuss the needs, design and functionality of their website, create prototypes and mockups of website using HTML5, React and TypeScript.

- Responsible for the automation of content creation and maintenance of technical blogs for the company to increase its visibility in terms of recruitment and services offered
- Design and develop simple graphics and illustrations, including video to the company's social media accounts using canva.com and DaVinci Resolve
- When needed, assist in technical hiring interviews for Canadian developers.

Web Developer

www.majisti.com

Jun 2022 – Present

As a Freelance Web Developer, my role in one of my clients is writing well designed, testable and maintainable code by using software development tools (JavaScript/TypeScript). I also contribute to websites using React and TypeScript, with Chakra UI as the design library.

- Maintain websites including content updates, account administration, debugging, feature enhancements, testing and documentation.
- Determine user needs by analyzing technical requirements
- Test and troubleshoot the website using various browsers
